

Power BI - Dashboard design

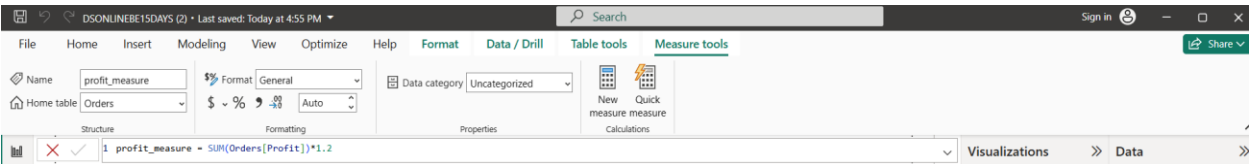

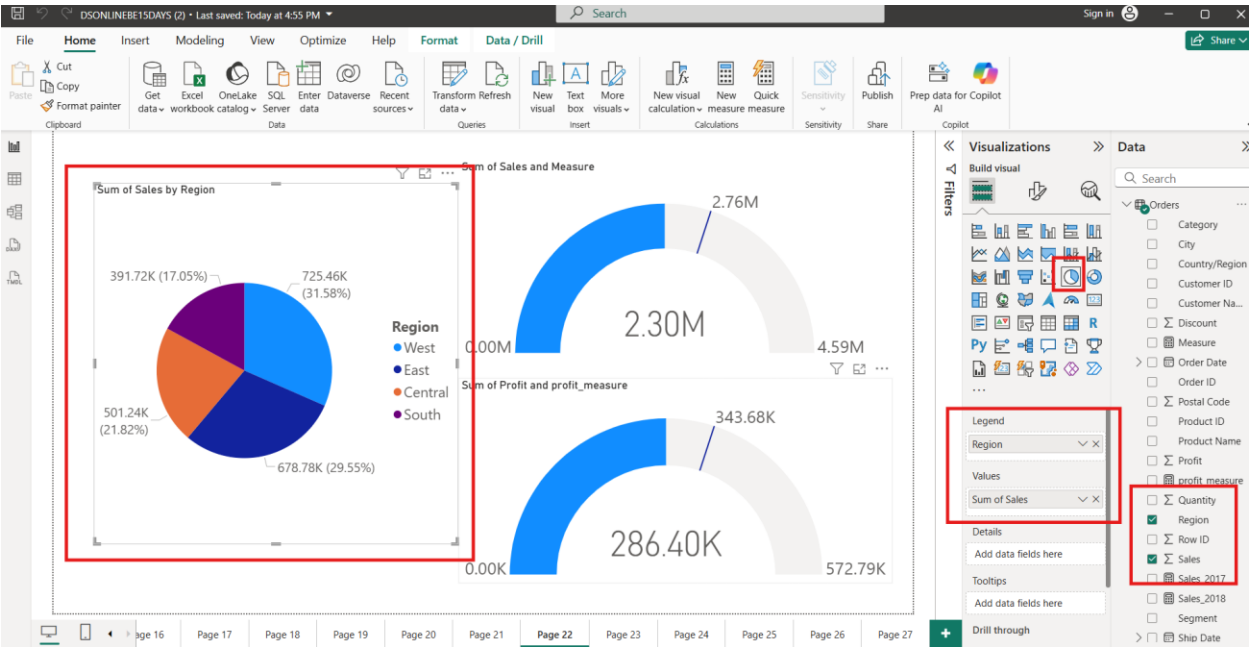

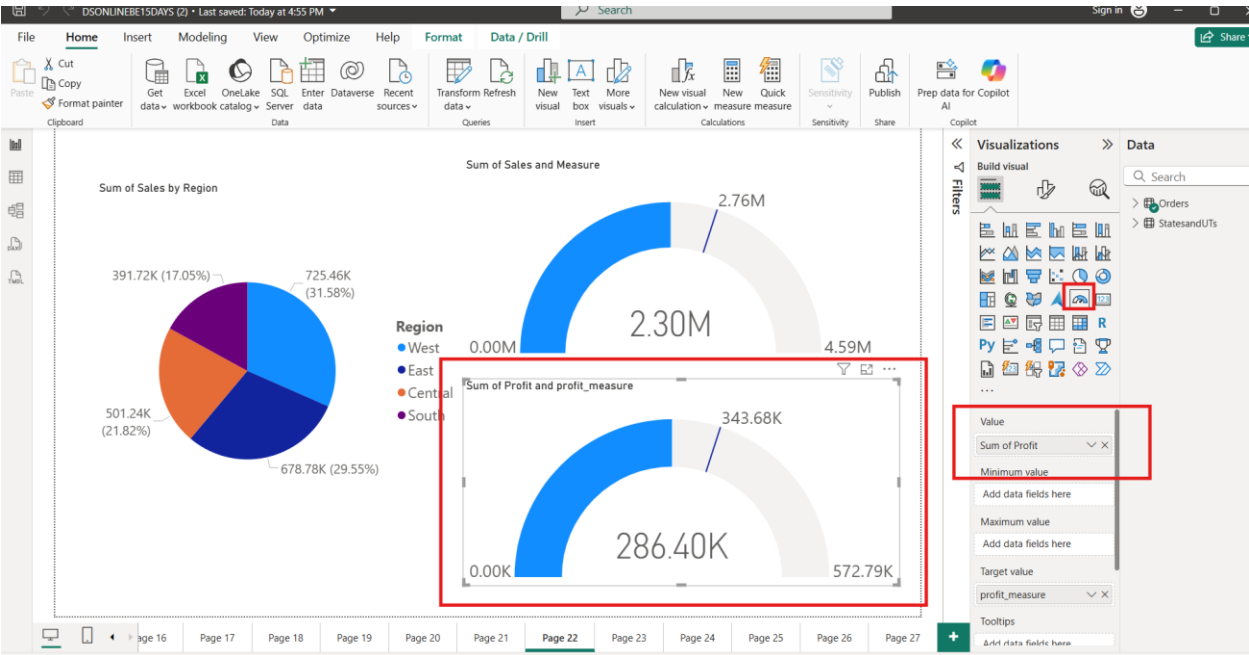

Day 09: 12 July 2025

This document includes step-by-step instructions for creating multiple Power BI visuals including Cards, Pie Charts, Bar Charts, Gauge Charts, Tables, and Slicers using a sales dataset. Final dashboard combines all visuals with DAX-based yearly sales measures.

1. Create Visuals For Following Chart:

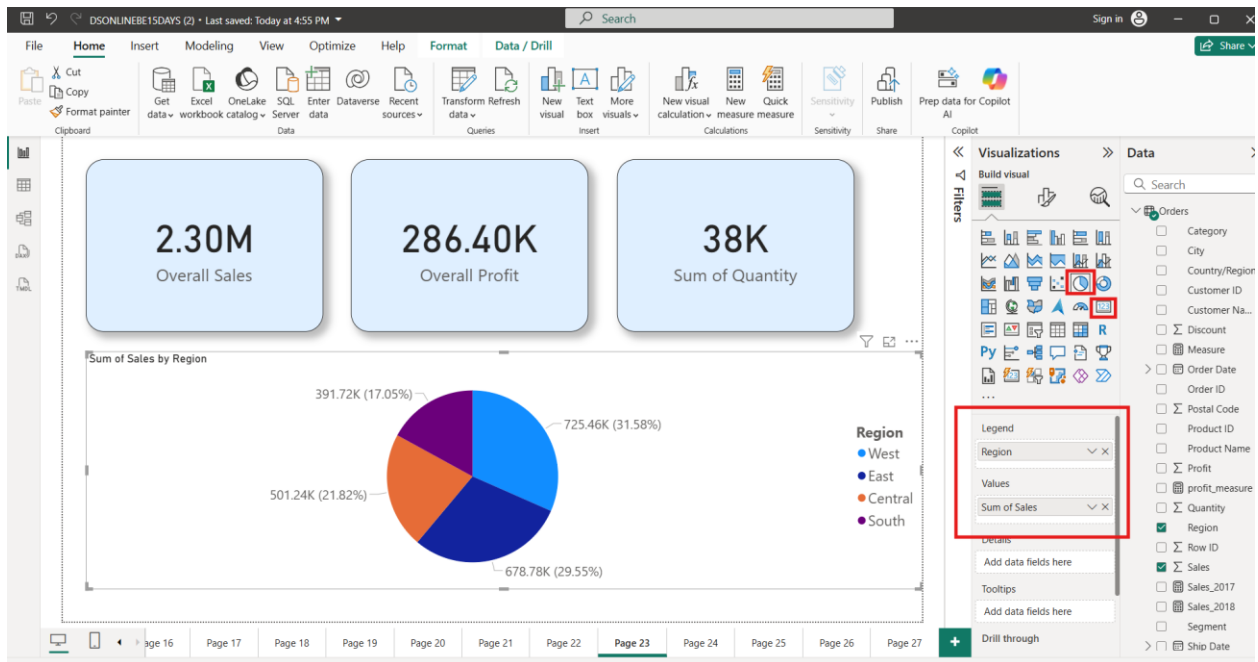

- a. Select **Gauge Chart** From Visuals
 - i. Value: Sales
 - ii. Target Value- Measure
- b. Select **Pie Chart** from Visuals
 - i. Legend: Region
 - ii. Values: Sales
- c. Select **Gauge Chart** From Visuals
 - i. Value: Profit
 - ii. Target Value- Profit measure

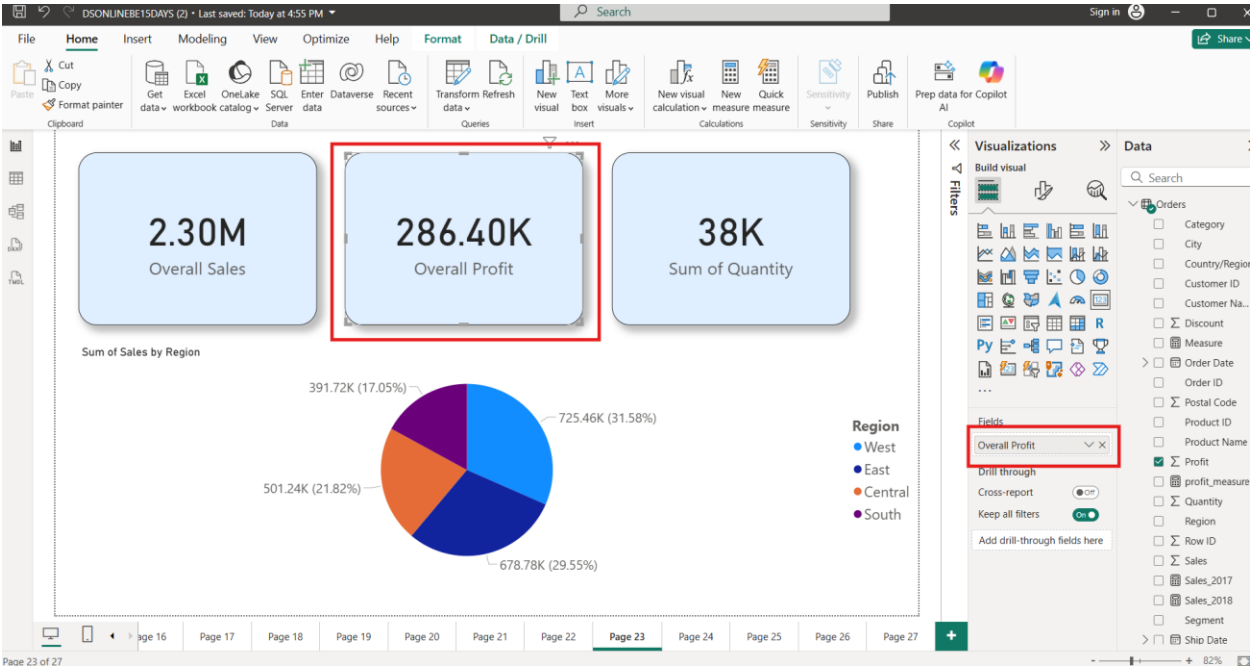

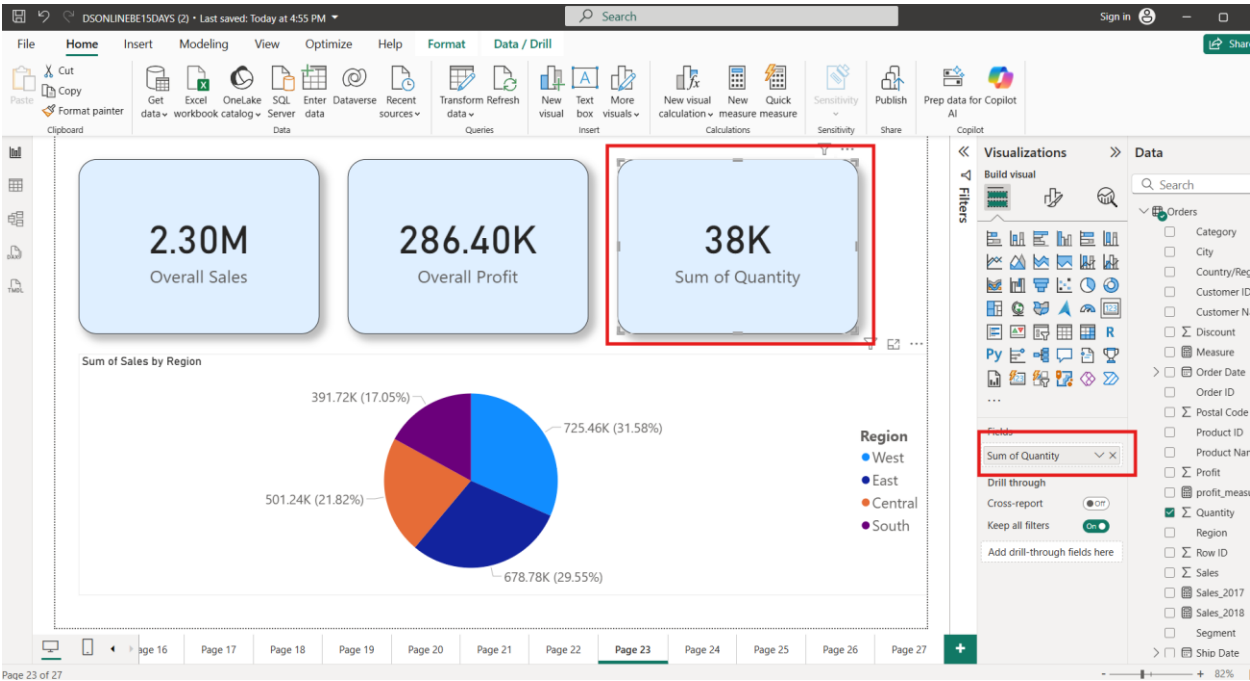

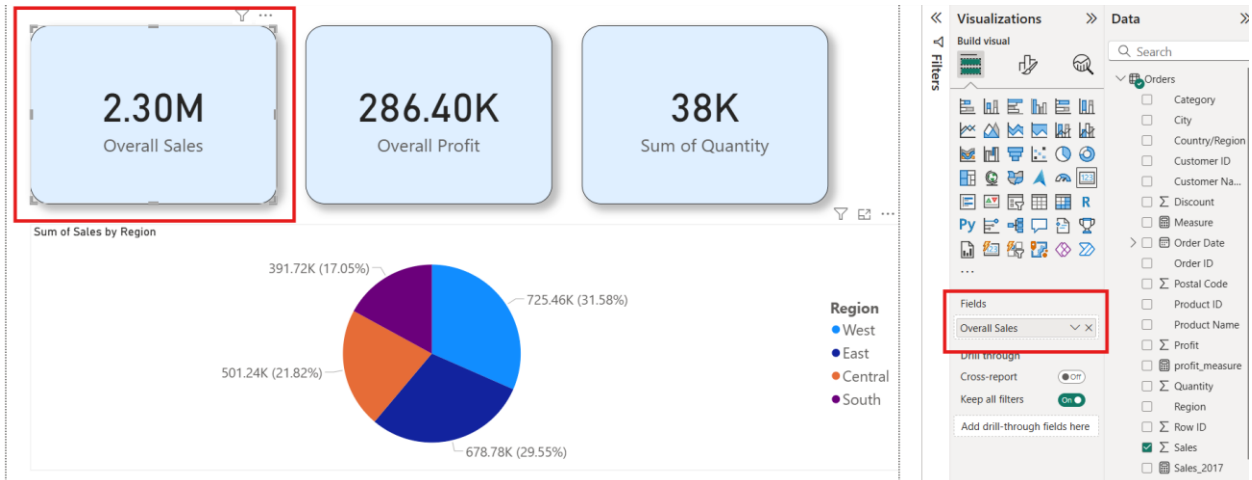

2. Create Visuals For Following Chart:

- a. Select **Cards** from Visuals
 - i. Card 1: Overall Sales
 - ii. Card 2: Overall Profit
 - iii. Card 3: Sum of Quantity
- b. Select **Pie Chart** from Visuals
 - i. Legend: Region
 - ii. Values: Sales

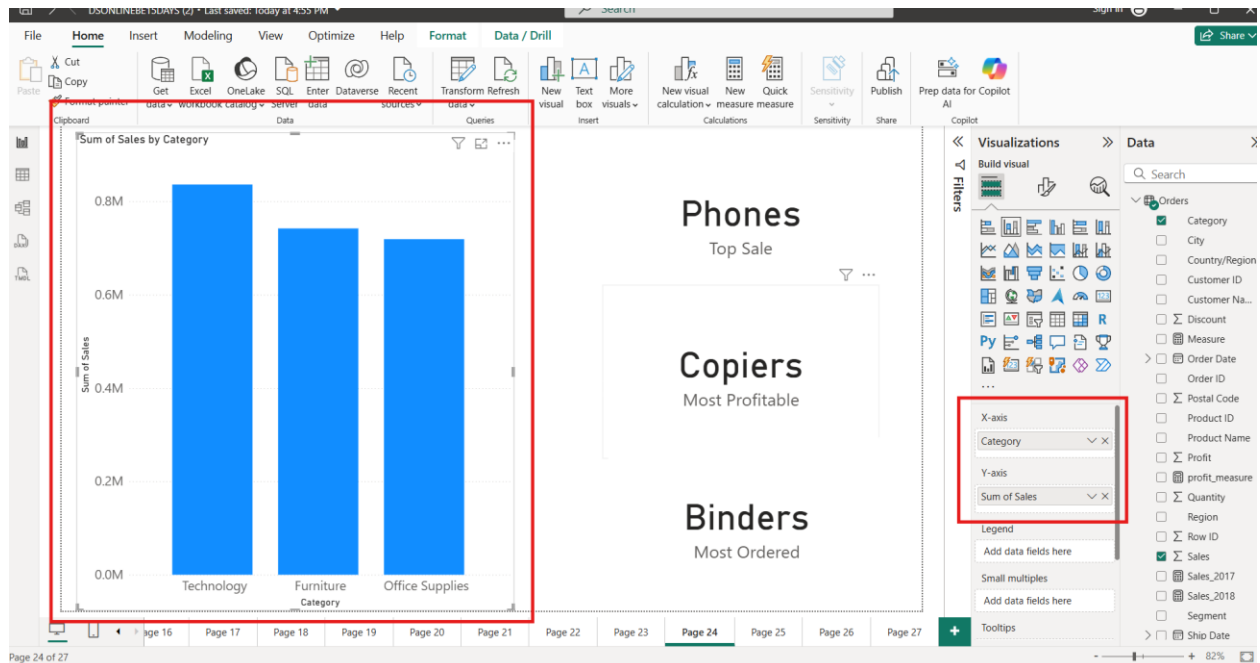

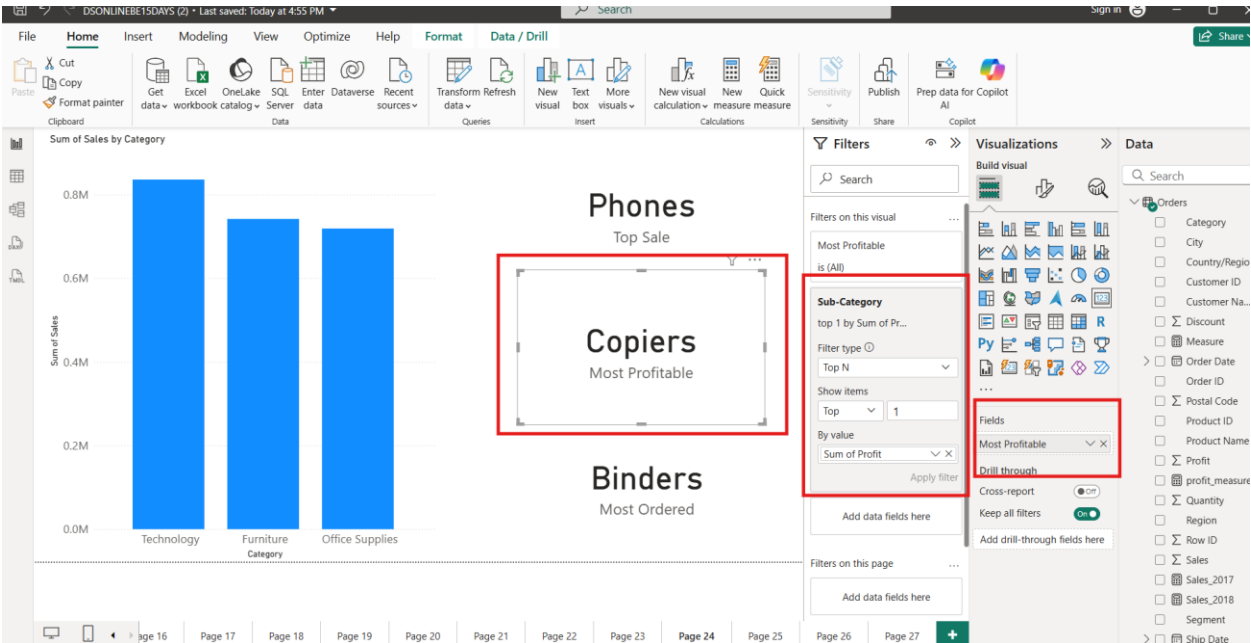

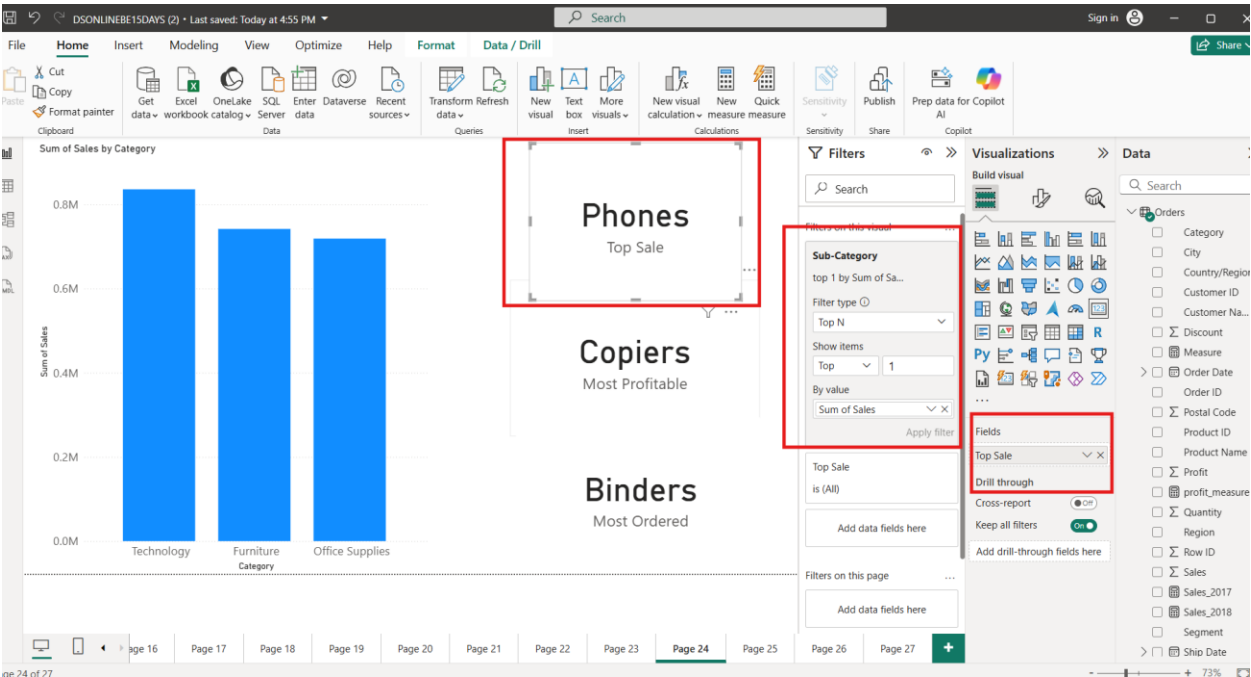

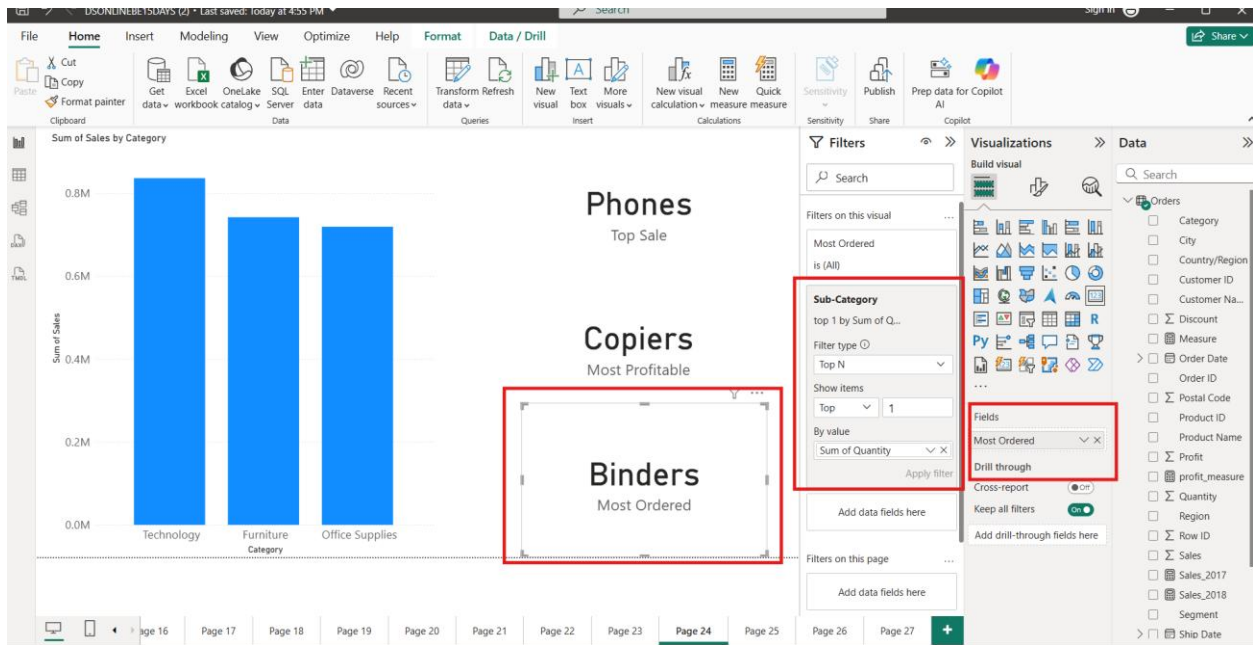

3. Create Visuals For Following Chart:

- Select **Cards** from Visuals (Use Filters Section)
 - Card 1: Top 1 Sales
 - Card 2: Most Profitable
 - Card 3: Most Orders
- Select **Bar Chart** from Visuals
 - X Axis: Category
 - Y Axis: Sales

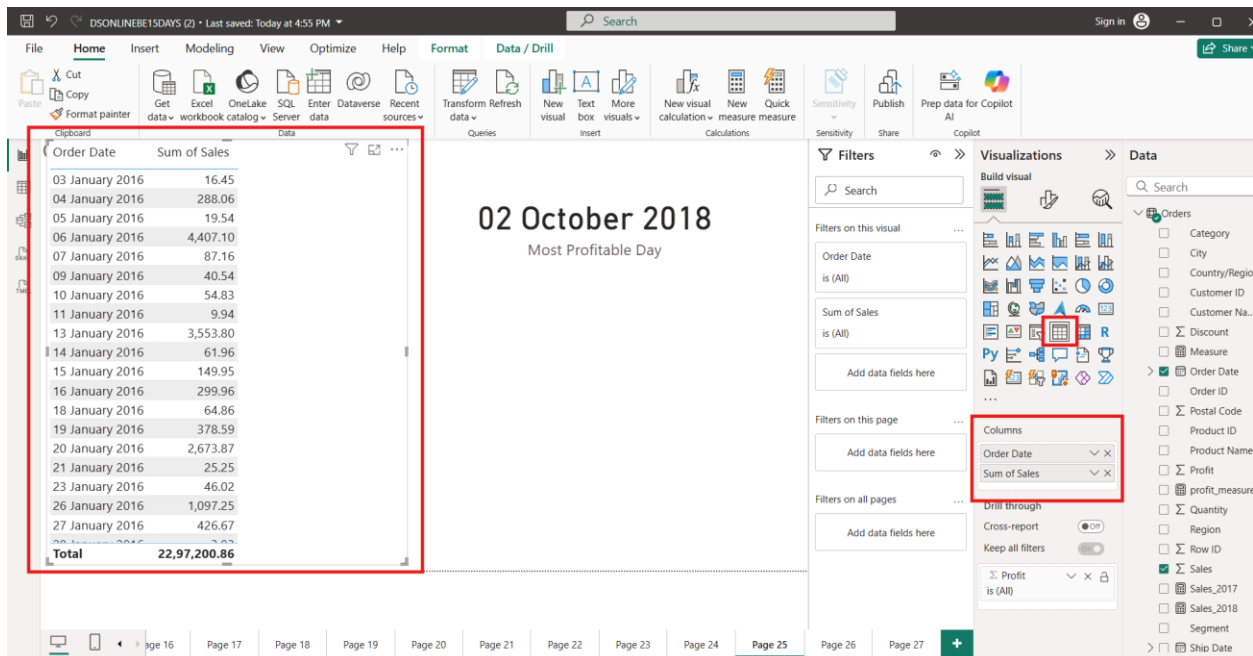

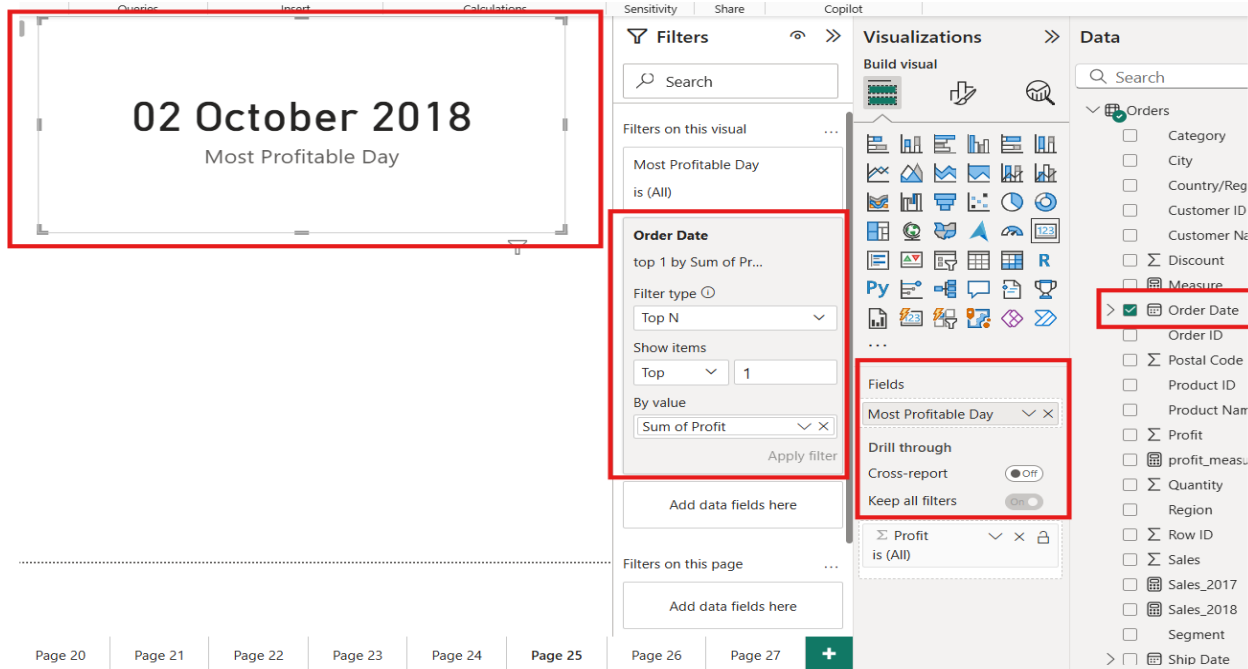

4. Create Visuals For Following Chart:

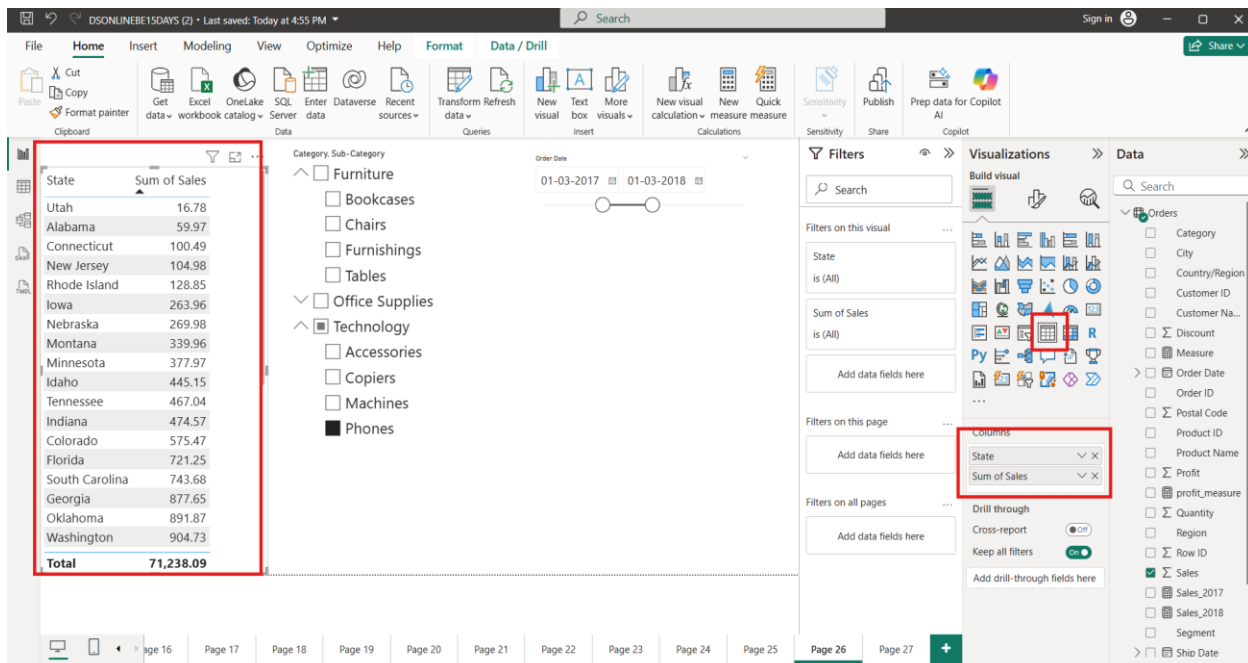

- Select **Cards** from Visuals (Use Filters Section)
 - Card 1: Order Date (with filter)
- Select **Table Chart** from Visuals
 - Columns : Order date , sale

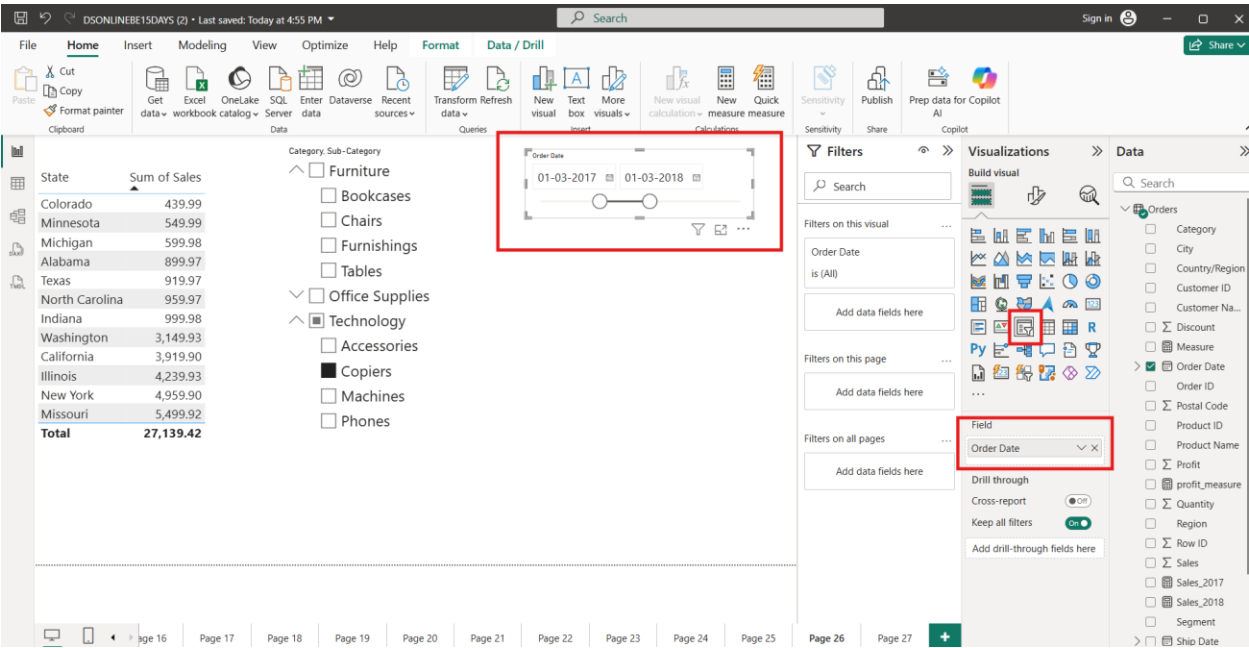

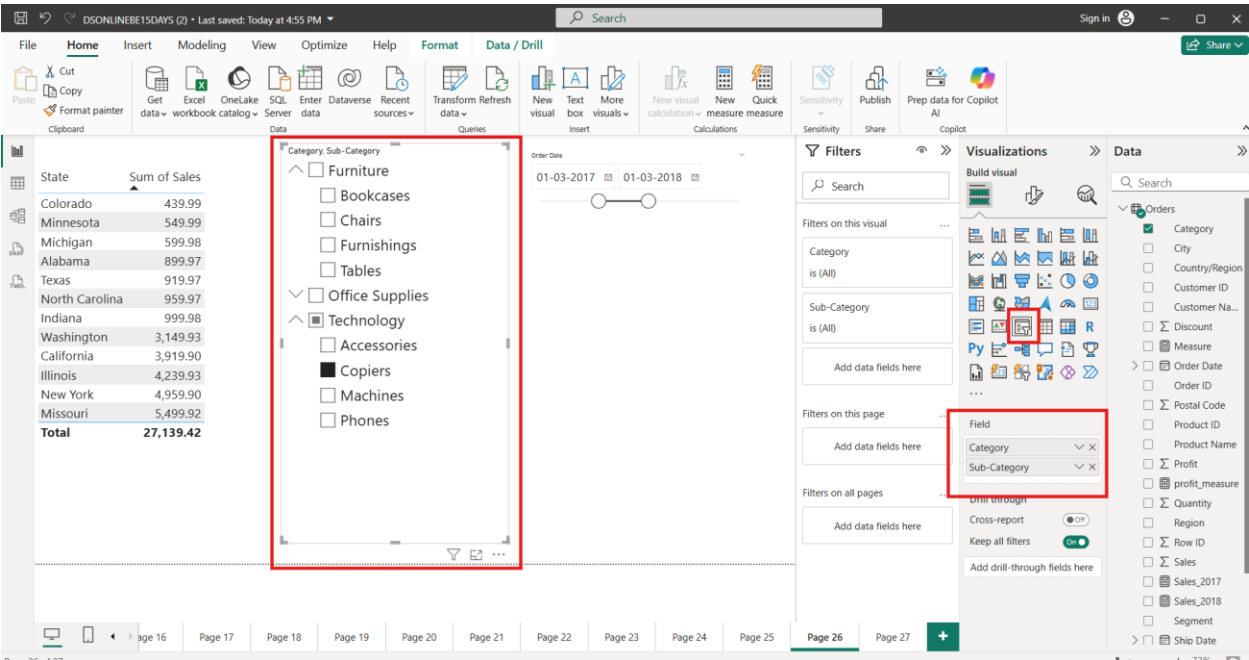

5. Create Visuals For Following Chart:

- Select **Slicers** from Visuals (Use Filters Section)
 - Slicer 1 Field : Category , Subcategory
 - Slicer 2 Field: Order Date
- Select **Table** Chart from Visuals
 - Columns : State , sales

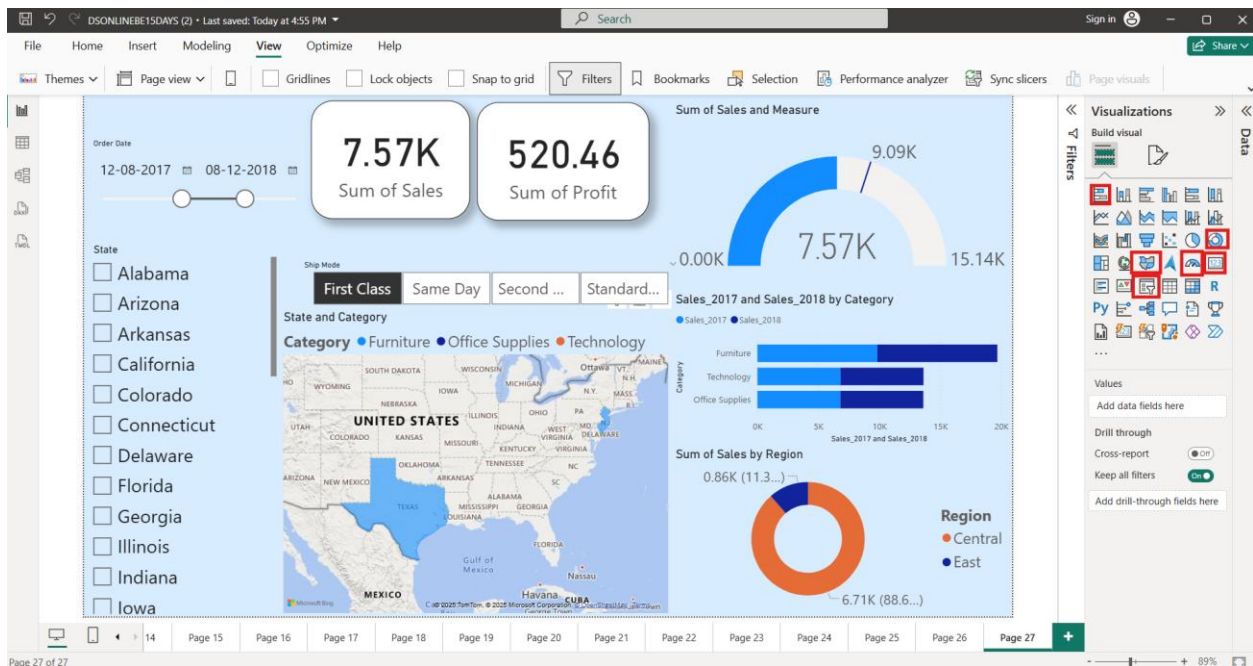

From above all chart prepare a final dashboard by following charts.

Sales_measure_2017:

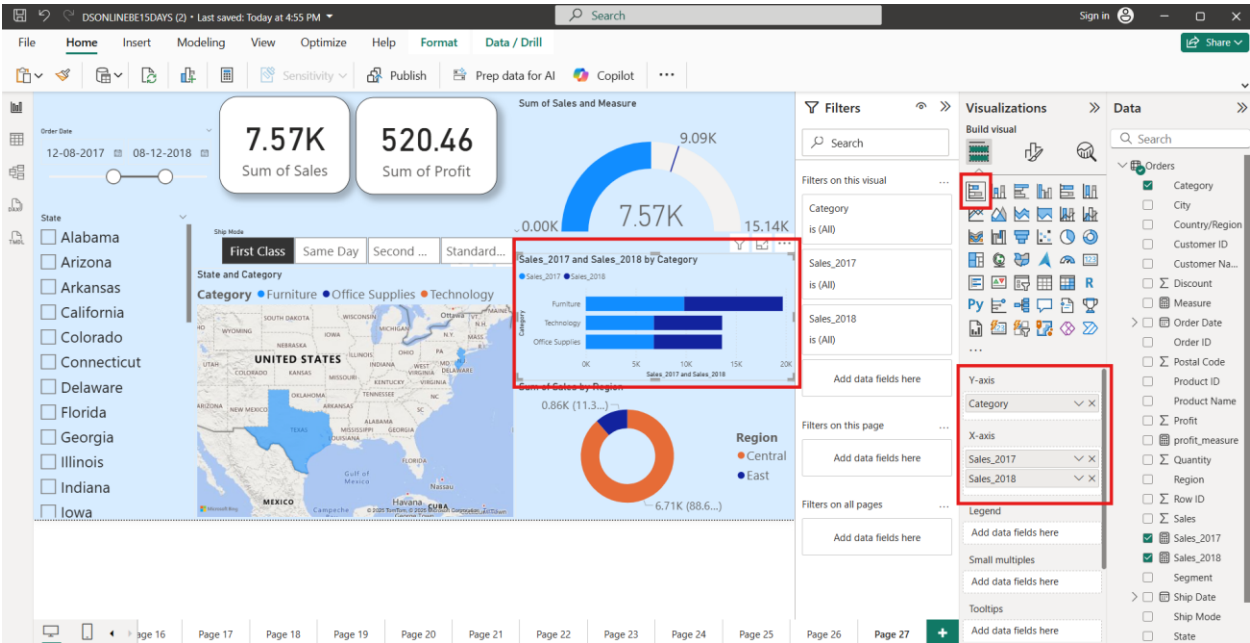

`Sales_2017 = CALCULATE(SUM(Orders[Sales]), YEAR(Orders[Order Date]=2017))`

Sales_measure_2018:

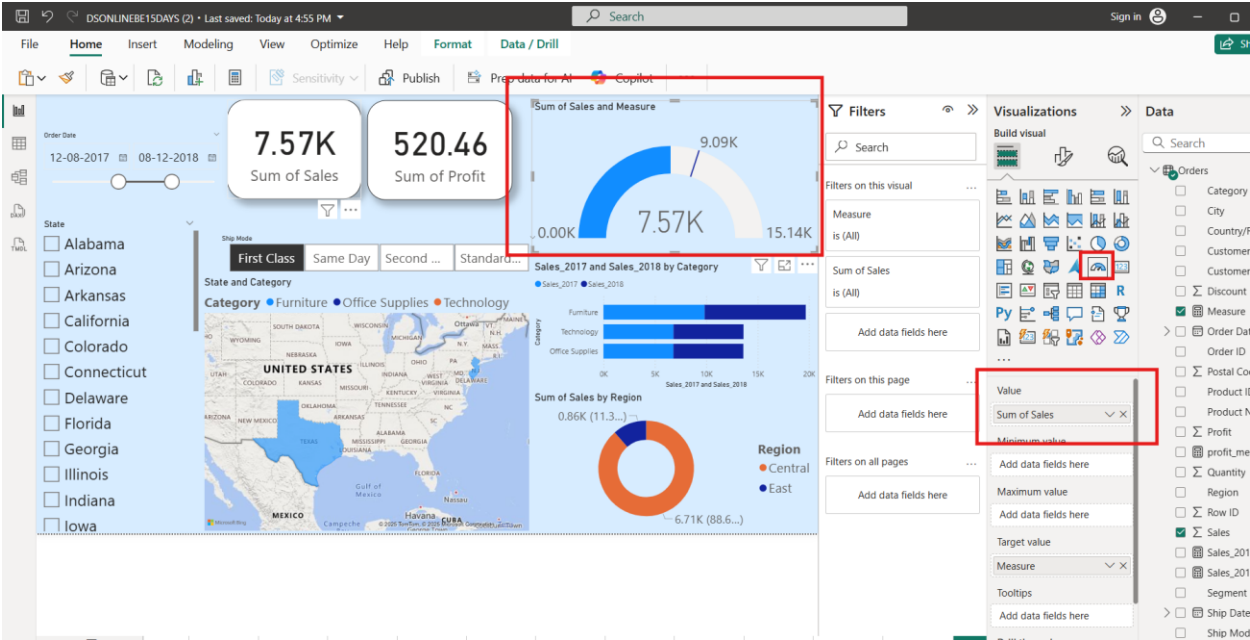

`Sales_2018 = CALCULATE(SUM(Orders[Sales]), YEAR(Orders[Order Date]=2018))`

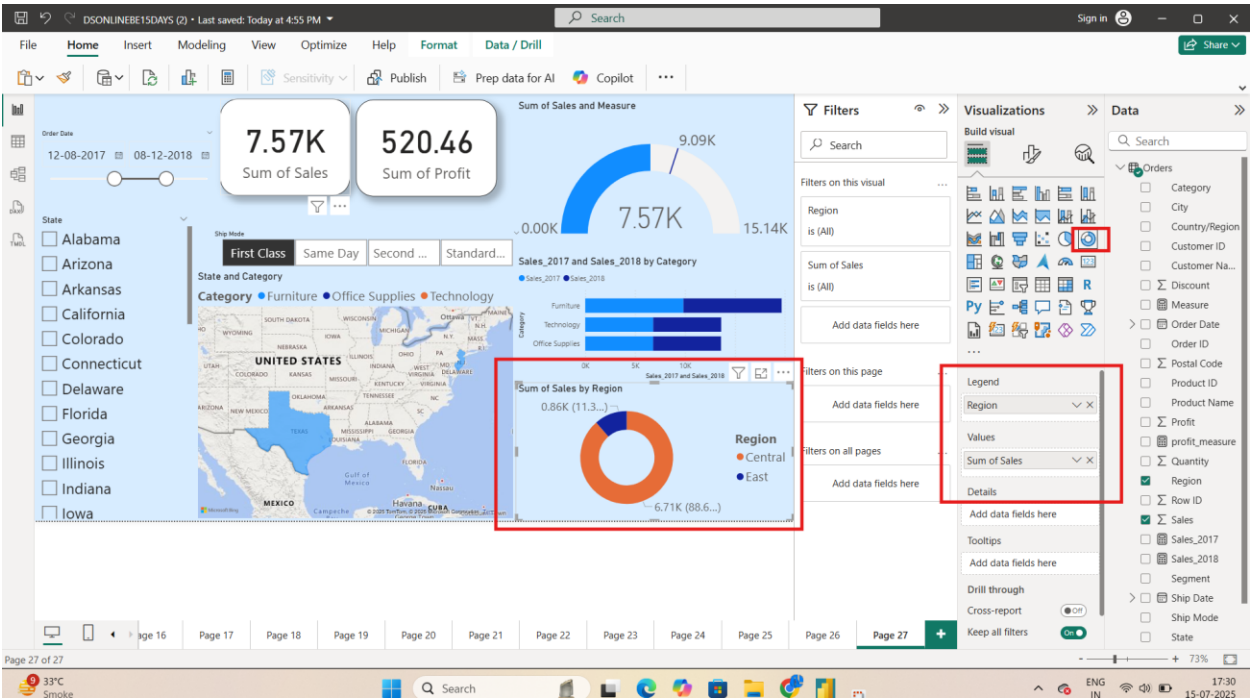

Bar Chart

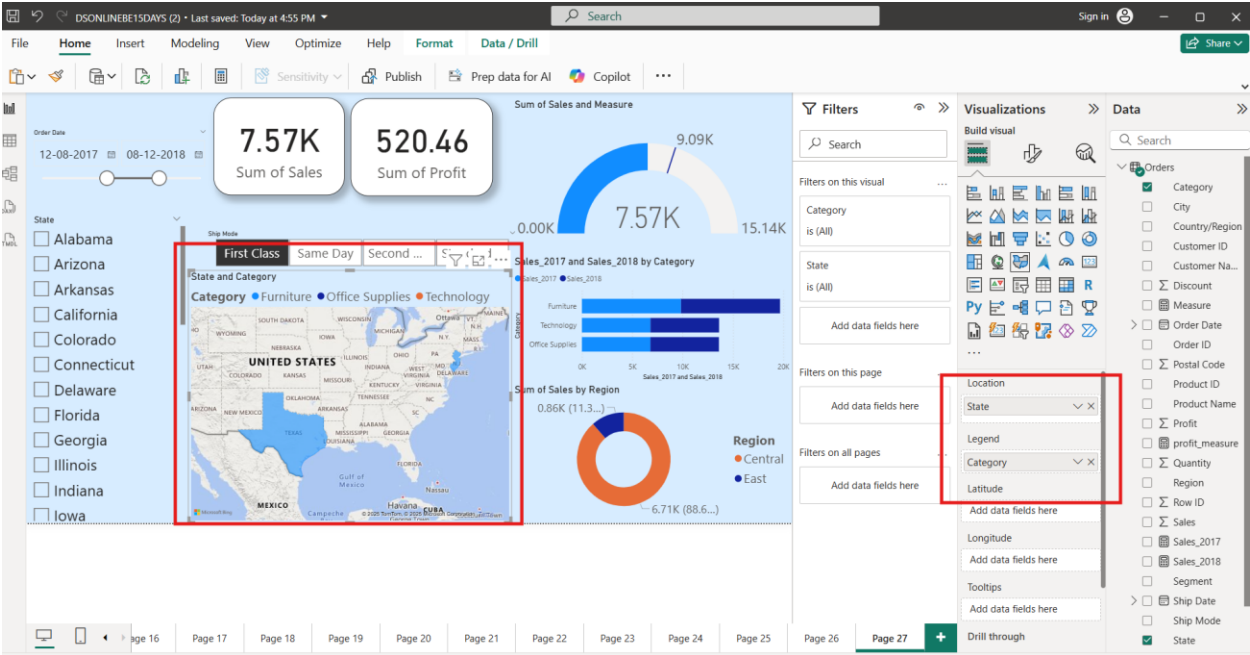

Guage Chart

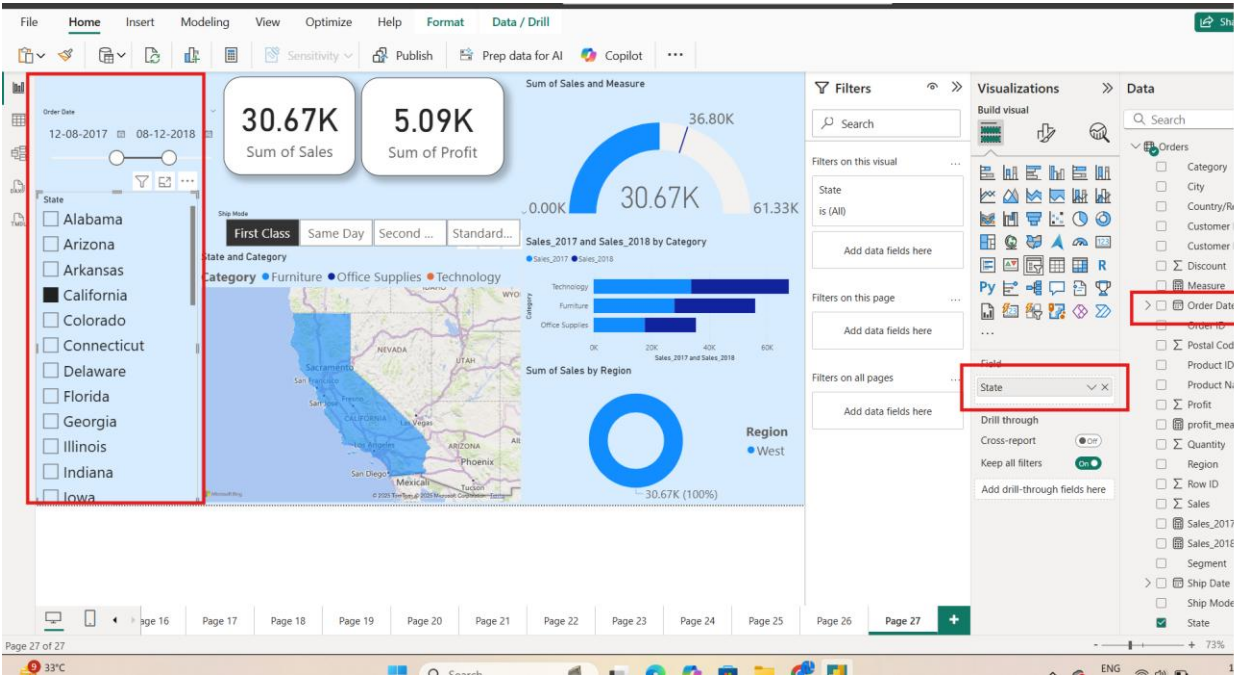

Donut Chart
